

FRIDGE

For fresh, healthy food, there is no denying the importance of a good-quality fridge. Mia Cucina offers a smart and stylish fridge with multiple stable shelves providing extensive space for plenty of fresh food.

ANTI-FROST TECHNOLOGY

Anti-frost technology constantly conducts humidity out of the fridge interior into an external evaporation tray. Air stays dry, frost does not form, and your food stays fresher for longer.

FAVOURABLE INTERVAL

The stylish fridge features clever design with a reversible door and five glass shelves, a drawer, egg tray, and ice holder. The shelves can be flexibly adjusted to cater for a wide range of needs, with all internal compartments able to be easily pulled out. The 4-star freezer compartment is a great place to keep your frequently used frozen items.

SPECIAL FUNCTIONS

“SUPER COOLING” MODE

This mode rapidly cools the fridge compartment – a fantastic way to chill large quantities of newly purchased fresh food. Once the set time has elapsed, the fridge returns to its pre-set temperature.

“SUPER FREEZING” MODE

Similar to ‘Super Cooling’ Mode, this setting quickly lowers the freezer temperature to accelerate the freezing process.

“HOLIDAY” MODE

Designed to be used during holiday periods, this mode allows the fridge to continue working normally while maintaining a set internal temperature to save energy.

Double-door Fridge
HF177

- Climate class ST
- Total net capacity 241 L
- Net fridge capacity 179 L
- Net freezer capacity 62 L
- 5 shelves and 1 drawer
- 4-star freezer
- LED lights
- 38 dB(A) noise level
- Reversible door
