

LAUNDRY

Mia Cucina's high-functioning Washer-dryer provides you with the ultimate level of flexibility and freedom, washing and drying your clothes precisely the way you desire. Packed with a wide range of features, this innovative and stylish unit perfectly controls your laundry cycle from start to finish – allowing you to get on with other tasks.

LARGE LOAD CAPACITY

With a spacious stainless steel drum interior, the Washer-dryer can wash up to 8 kg and dry up to 5 kg of clothes. It is operated by a touch control and manual knob. The large loading capacity provides excellent results and reduces the number of washes required, meaning less water and energy are consumed.

WOOL APPAREL CARE

Do you have delicate woollens that you are afraid of putting through the wash? The 'wool apparel care' function is specially designed to be gentle to your most cherished woollen garments. You will find 13 washing programmes in total, catering to all your laundry needs.

DELAY START

This function makes managing your time easier by giving you the flexibility to choose when the laundry cycle starts and finishes. The start of a programme can be delayed for a certain amount of time.

WATER PROTECTION SYSTEM

The inbuilt water protection system prevents faults by stopping the machine from taking in too much water.

EASY TO USE

The large, intuitive multi-function display panel allows you to set the temperature, spin speed and other additional washing programmes conveniently. A sensor allows for adjustments to be made mid-cycle, guaranteeing your clothes are always clean and dry when you take them out. The off-set and enlarged front door design makes the unit simple to open and access.

ENERGY EFFICIENT

Mia Cucina's Washer-dryer has been awarded Grade 1 Hong Kong Energy Label and Water Efficiency Label, making it good for both your bills and the environment.
