For decades, Towngas has been applying its engineering and project management expertise to improve the quality of life and ergonomics in kitchens for countless families in Hong Kong. “The Kitchen with You in Mind” reinforces the view that all kitchen designs must be customer requirement-driven. This inherently leads to breathtaking designs that are unique and intimately personal.

The customer-driven philosophy

All Mia Cucina designs are realized using only the choicest materials of the highest quality. Imported from Europe, materials are selected for their suitability to Hong Kong’s environment. Furthermore, accessories are specially selected to enhance usability and to provide an aesthetic quality.

The Mia Cucina quality is the amalgamation of our expertise in culinary, design and engineering domains, ensuring that each kitchen is the fulfillment of our customer’s personal vision. Inspired by Master Chefs and drawing from a wealth of experience, storage spaces become an outlet for creativity rather than a problem of limitation.

At Towngas, award-winning service quality is assured from start to finish. From on-site surveying, project planning, design and implementation to after-sales service, every step is undertaken by Towngas professionals committed to your satisfaction.
